

Reduced weight without reduced strength

PRODUCT NAME:
Xstage S10

The new S10 deck from Xstage delivers top staging performance perfect for any size of live events. The new deck features a sleek custom extruded aluminium profile which reduces overall weight without sacrificing load capacity. S10 includes a universal leg securing system to suit a wide range of leg options, a new indoor / outdoor, slip-proof hexagrip surface, and tough 12mm birch plywood construction. The range delivers long-lasting durability and safety, and as with all Xstage decks is designed to fully comply with DIN 15921 standards.

- Optimized aluminium profile reduces overall weight to only 33kg
- Universal leg securing system with cube lock system for trouble-free leg attachment
- Waterproof construction for both indoor and outdoor use
- 12mm birch plywood deck provides heavy-duty strength and durability
- New hexagrip surface for increased traction in all weather conditions
- In accordance with DIN 15921
